This survey was conducted on the weekend of 16-18 February 2007 on the telephone, by trained interviewers in all states of Australia and in both city and country areas. Telephone numbers and the person within the household were selected at random. The data has been weighted to reflect the population distribution. This survey is based on 1205 interviews among people aged 18 years and over. The maximum margin of sampling error on the total sample is plus or minus 3 percentage points.
