These surveys were conducted on the telephone by trained interviewers among voters in all states of Australia and in both city and country areas. Telephone numbers and the person within the household were selected at random. The data has been weighted to reflect the population distribution. This latest survey is based on a reanalysis of surveys conducted during April - July 2007 and is based on a total of 6,957 interviews among voters. Individual state sample bases range from 865 to 2,017 voters. Note: sample size in Tasmania is too small for a meaningful separate analysis, however Tasmania is included in total figures. Northern Territory is excluded. Sampling error ranges from plus or minus 1.5 percentage points on the total sample to plus or minus 3.5 percentage points for the state with the smallest sample size. Copyright at all times remains with NEWSPOLL. More poll information is available at [www.newspoll.com.au](http://www.newspoll.com.au)
